ASH GROVE CEMENT COMPANY

"WESTERN REGION"

August 27, 2007

Re: Ash Grove Cement Company. Planting Plan City of Seattle Project #3003446
WDFW HPA #103568-1

Note to File:

The planting area referenced in the above plan was reviewed per plan guidance. Pictures were taken in at least four locations and a judgment made regarding the survival rate of the plants and trees. To ensure at least an 80% survival rate, the identified area was initially over planted with the required species. As of this writing, all the planted trees and shrubs are alive and the 80% survival rate is being achieved therefore meeting SEPA and Shoreline requirements. Watering and weeding has taken place to help ensure the survival of the plants.

Sincerely,
Ash Grove Cement Company

Craig A. Puljan
Plant Manager
